Lebanon
Montenegro
Mozambique
Sierra Leone
Somalia

* These maps are for illustrative purposes and do not imply the expression of any opinion on the part of the Landmine and Cluster Munition Monitor.

** The Monitor acknowledges the contributions of the Mine Action Review (www.mineactionreview.org), which has conducted the primary mine action research in 2018 and shared all its country-level landmine reports (from "Clearing the Mines 2018") and country-level cluster munition reports (from "Clearing Cluster Munition Remnants 2018") with the Monitor. The Monitor is responsible for the findings presented online and in its print publications.

*** The term "cluster munition casualties" is used to refer both to people killed and people injured as a result of cluster munition use or cluster munition remnants. Cluster munition victims include survivors (people who were injured by cluster munitions or their explosive remnants and lived), other persons directly impacted by cluster munitions, as well as their affected families and communities. As a result of their injuries, most cluster munition survivors are also persons with disabilities.
